

PRECISION METAL PARTS

Our precision metal parts are manufactured using advanced CNC machining techniques. We have a proven track record, having been established in 2008. Our state-of-the-art facilities are equipped with the latest technology, including 8-axis CNC machines and 10-axis CNC machines. We have a capacity to produce up to 250 parts per hour, with a total production capacity of 12,000 parts per month. We work with a variety of materials, including aluminum, stainless steel, titanium, and Inconel. Our products are used in a wide range of industries, including aerospace, automotive, medical, and industrial machinery. We are committed to providing high-quality, precision-machined metal parts that meet the most demanding requirements. Our products are used in a wide range of applications, including:

- Aerospace components
- Automotive parts
- Medical devices
- Industrial machinery
- Defense and military equipment
- Marine and offshore equipment
- Power generation equipment
- Chemical processing equipment
- Food and beverage processing equipment
- Pharmaceutical equipment
- Research and development equipment
- Consumer electronics
- Construction equipment
- Agricultural machinery
- Energy equipment
- Environmental testing equipment
- Scientific instruments
- Defense and military equipment
- Marine and offshore equipment
- Power generation equipment
- Chemical processing equipment
- Food and beverage processing equipment
- Pharmaceutical equipment
- Research and development equipment
- Consumer electronics
- Construction equipment
- Agricultural machinery
- Energy equipment
- Environmental testing equipment
- Scientific instruments
