

Aluminum and Steel Casting

Our company provides a wide range of metal casting services, including aluminum and steel. We have a proven track record, having been established in 2008. We offer a variety of casting services, including sand casting, investment casting, and die casting. We have a capacity of 8,000 units per month and can handle a wide range of part sizes, from 250 grams to 12,000 grams. We use advanced machinery, including Houdry, AMADA, AMETEK, and OERLIKON, to ensure the highest quality of our castings. Our services include design, prototyping, and production. We are committed to providing our customers with the best possible service and quality. Our products are used in a wide range of industries, including automotive, aerospace, and industrial machinery.

We are a leading provider of metal casting services, with a focus on precision and quality. Our experienced team of engineers and technicians ensures that every part is cast to the highest standards. We offer a wide range of materials and finishes, and can provide custom solutions for your specific needs. Contact us today to learn more about our services and how we can help you with your casting requirements.
