

Heat treatment (out house): For the heat treatment, we subcontract to our local qualified supplying factories to process at the out of Atlas house. Generally we can meet any heat treatment requirements on the metal works, such as annealing, normalizing, tempering & quenching, surface hardening and etc.

Surface treatment: The surface treatment is to do out house. Our suppliers help us to supply our customers a wide range of surface finish solution, such as hot dip galvanizing, zinc plating, nickel plating, chrome plating, powder coating, epoxy painting, anodizing, black oxide, E-coating and etc.

Inspection:

Whole inspection procedures (IQC, PQC and FQC) and QA plan are carried out in house to be compliance with the rules and regulation of ISO 9001:2000

Quality control always be doing on site and on time, never try to do later;

If the customer found it is necessary any third authorized inspection organization are welcomed to witness the quality before the shipment
