

What can Houdry do?

>>We have professional technical team,can help you with product design.

>>Our production involves the CNC machining and sheet metal,welding, laser cutting,wire cutting,deep drawing etc.can help you with complex processing products.

>>Stable support for heat treatment and various surface treatment to meet customer s overall requirements.

>>High quality and accuracy lead time

How we ensure the quality?

>>Once the order release,technology department will study the whole processing and attention according to customers requirements,and make the QC schedule,SIP,improve the decompose drawings of each process, call all department together to emphasis each process control point.

>>Quality control inspecting during all the production from raw material purchasing,production,surface treatment and package,so they can amend in time once issue happened.
